

SARS-CoV-2 Testing

On surfaces, consumer goods
and medical devices

As of now, we can carry out surface tests for the corona virus in our laboratories!

Many people and companies would like to have more security and information about how widespread the virus is in their environment and what infection potential this has.

Correctly conducted environmental investigations contribute to a better overview of the spread of the virus in our environment.

We provide you with suitable swabs with which you can take samples of:

- Sales counters, door handles, light switches, work objects, keyboards, shopping trolleys etc.
- Toys, toothbrushes, packaging materials etc.
- Respiratory masks, protective clothing etc.

These samples are then analysed for SARS-CoV-2 in our laboratories for you.

Unit price per sample: €129

From 3 samples in one order: €109

From 10 samples in one order: €79

The prices are exclusive of VAT

From more than 50 samples we would be pleased to send you an individual offer.

In order to make the procedure as simple and practical as possible, our laboratories will send you the necessary equipment by post.

On the basis of the sampling instructions included, you can send the samples back to us uncooled in a transport medium. Within 3 days after receipt of the samples you will receive the results from us!

Do you have questions or would you like to know more? We will be happy to advise you.

Please contact your respective contact person in our laboratories.
